Finlogon Software Enterprise Edition (EE)

FinLogon Enterprise Edition (EE) for MS Windows 2000/2003/2008 Server

The Finlogon EE works with FS80 USB2.0 Fingerprint Scanner and integrates seamlessly with MS Windows 2000/2003/2008 Server Active Directory.

All domain users can logon to an Active Directory with a finger touch at any client workstation.

No more passwords!!!!

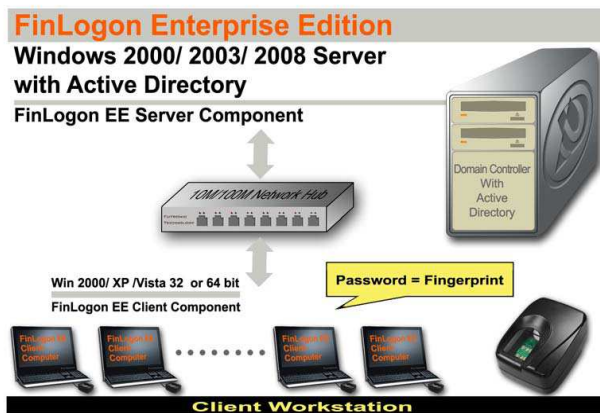

This makes the life of both ordinary computer users and system administrators simpler and easier.

FREE SOFTWARE TOOLS

FinLogon EE users can also make use of two free software tools from Axeze,

- One Touch Password Filler
- Fingerprint File Encryption

These come in the **FinLogon Add-on Pack**, and provide a more secure and convenient computing environment.

LICENSE FEES – Cost Effective

We charge a per user license fee for Finlogon Enterprise Edition. You pay according to the exact number of users that are using this software.

No setup charge, bundles and additional fees.

FINLOGON ENTERPRISE EDITION

Finlogon Enterprise Edition is fingerprint authentication software that runs on MS Windows 2000/2003/2008 Server using proprietary fingerprint recognition

technology for **TOTAL LOGON MANAGEMENT AND PASSWORD CONTROL.**

So easy

- It consists of server and client components. Installation is very easy and it can be set up and running in 2-3 hours.
- It has the same user interface as **Finlogon Personal Edition**.
- If you have been using Finlogon Personal Edition, it is very easy to upgrade to Finlogon Enterprise Edition.

Features

- Supports Windows 2000/2003/2008 Server Active Directory
- Logon Domain Controller by a finger touch. **NO MORE PASSWORDS**
- Prevent unauthorised access to Server/Domain Controller
- Fingerprint recognition accuracy: FAR-10⁻⁶, FRR-10⁻²
- Support MS Windows 2000/XP/Vista 32&64bit at client workstation
- Use Active Directory Schema Extension technology
- All fingerprint data are stored in Active Directory with 256bit AES encryption
- Fingerprint data can be imported and exported.
- Auto-detect password change in Active Directory
- Support fingerprint data auto-replica in multi domain controllers environment
- Fingerprint data transmission by TCP/IP
- All data transfer is protected by Diffie-Hellman key exchange algorithm.
 - 4 authentication options:
 - Fingerprint only
 - Password only
 - Both fingerprint and password
- Support return from Standby, Hibernate, Windows Lock and Screen Saver
- Support Live Finger Detection(LFD) when used together with FS80 USB2.0 Fingerprint Scanner

Benefits for Users

- No need to memorise password(s) to logon to computer/server/domain because their fingers are the passwords which will not be forgotten or lost
- Eliminate the headache of frequently changing passwords

Benefits for the System Administrator

- No "user lockup" because of entering wrong password
- No more request for "reset password" from users
- Better user identity management: know exactly who is logging on

Benefits for the Enterprise

- Improve overall system and data security because of the elimination of password-based authentication system
- Better overall workforce productivity
- Reduce computer network management cost

TOTAL LOGON MANAGEMENT AND PASSWORD CONTROL.
