AXEZE
Access Control Systems

AR-S- W2-EM
Waterproof Standalone Prox Card Reader w remote for programming
Anti-Tamper fitted
Programming card to Add and Remove Cards
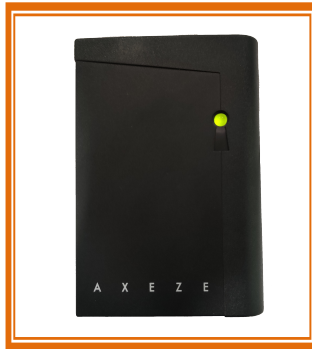

AR-S-W2-A Weatherproof Reader (EM+HID)
RFID card reader
Waterproof, rated to IP68
User capacity: 10,000
Card Interface: 125KHz EM +/or HID card
Remote control for programming
Wiegand 26 input/output
Block enrolment

AR-S-W2-A works with your electric door strike.
If the door strike is already fitted you can easily install this unit yourself.
If you need to purchase a door strike, all Security companies and Bunnings sell them and you can install it yourself.
If you are not a home handyman you can arrange for an electrician, carpenter, security installer to install the system for you.

Additional cards and keyfobs available from Axeze

AR-S-W Standalone RFID access control system

Appearance: plastic matte technic, durable.
Support Card: 125KHz EM, 125KHz HID, 13.56MHz.
Output Format: 26bit is factory default setting.
For Wiegand 26, reader will output according to card's format automatically.
Ultra-low Power Consumption: ≤30mA.
Built-in optical tamper alarm technology.
Protective Performance: IP65 (fully-potted), tamper alarm.
Certificate: CE

Standalone Reader and Controller and Slave Readers

Specifications

Supply Voltage: 12VDC
Standby Current: ≤30mA
Communication Interface: Wiegand26-37
Response Time: 0.1s
Card Reading Range: 3-6cm/2-6cm
Operating Temperature: -40℃～60℃
Humidity: 0-95%
Level of Protection: IP65
Antistatic: 15KV
Transmit Distance: 100M
Cable Length: 90-100cm
Dimension: 103mm × W48mm × H23mm

Anti-tamper Technology
Built-in light dependent resistor (LDR) for anti-tamper. It will alarm once there is a person unauthorized try to access.
